

I am a trucker and the instant traffic and weather, helps very much on the xm satellite radio. I don't listen to the regular stations, so if you take it off xm satellite, I would be flying blind. Don't try to make the National Association of Broadcasters dictate what we are able to hear and by whom, it is still a free country as far as I know, as of yet we have not become another country. Please reject NAB'S petition 04-160 and support XM.  
thanks
